

PRESS RELEASE  
FOR IMMEDIATE DISTRIBUTION:

## Vantec Expands the NexStar Hard Drive Dock Line

### *The NexStar Hard Drive Dock Series Expands with two more Selections to the Line Offering a Dual Bay and an Entry-Level Single Bay Model*

FREMONT, California – February 20, 2009 – Vantec Thermal Technologies, a worldwide leader specializing in computer accessories introduces two new additions to the NexStar Hard Drive Dock line—the Dual Bay, NST-D200SU with support for the USB and eSATA external interface and the entry level model NST-D100S2. The new dual bay NexStar Hard Drive Dock features two hard drive slots allowing flexibility of transferring data from drive to drive while the entry level NexStar Hard Drive Dock offers great value.

The Vantec NexStar Hard Drive Drive dock line allows users to access, transfer, copy, or backup files with simplicity and without opening a computer case or installing into an enclosure. The NST-D200SU offers users the ability to seamlessly connect two SATA hard drives via USB or eSATA for easy access to the data within using virtually any computer. All users need to do is to slide any SATA hard drives into the dock and instantly gain access to the hard drive. While the NexStar Dual Bay Dock offers a wide range of functionality for power users, the entry level single bay NST-D100S2 provides a taste of what the premium model has to offer at a fraction of the price.

Being the pioneer in the hard drive accessories market, Vantec has continued to expand their popular NexStar Hard Drive Dock line. By adding these two models, Vantec now has an extensive line of hard drive docks allowing the support for multiple interfaces at various price ranges.

The NexStar Hard Drive Docks are available now in major retailers. For additional product information and full technical specifications, please visit [www.vantecusa.com](http://www.vantecusa.com).
