

## Vantec Adds Power Cube 5200 to Mobile Accessories

TAIPEI, Taiwan – November 27, 2012 – Vantec Thermal Technologies—a worldwide leader specializing in computer accessories, storage and mobile solutions—announces the addition of the Power Cube 5200 Portable Battery Bank. This new product expands on the existing portable battery bank, Power Gem 3500 which was introduced earlier this year. The new Power Cube 5200 expands battery capacity to 5200 mAh allowing up to three full charges for any standard smart phone.

Like the Power Gem, the Power Cube contains two dedicated USB charging ports. However, each port is now rated at up to two amps providing not only faster, but shorter charge time for mobile devices. With features including over-charging and over-discharging protection, this battery bank ensures mobile devices are provided with a current that is reliable while providing customers with a piece of mind. While not in use, the Power Cube automatically switches to power saving mode allowing the battery capacity to last for extended periods of time on a single charge. To fully charge the Power Cube will take up to 4 to 4.5 hours.

With the increasing dependency on mobile smart devices, having an extra battery on hand becomes commonplace. The Power Cube 5200 allows for any users to have back up power at any given time when they need it most.

The new Power Cube 5200 will be available on the market this December. For additional product information and full technical specifications, please visit [www.vantecusa.com](http://www.vantecusa.com).
