Hard Drive Cooler

PRODUCT DESCRIPTION

The HDC-701A-BL keeps your hard drive cool near ambient temperatures, protecting it from a hard drive's major enemy, heat. A cooler hard drive will be more stable and less likely to suffer a mechanical failure. Keeping your drive well below its specified temperature range is the easiest way to make sure your drive will perform optimally. The larger 70mm fan provides plenty of airflow while spinning at a low RPM, creating less noise. With the HDC-701A-BL hard drive cooler, you can ensure the reliability of your important data on even the hottest drives.

FEATURES

- Aluminum alloy material 100% heat dissipation
- High airflow
- Ultra Quite Fan
- Extended HDD's life - make PC system stable
- Easy installation
- Stylish Design

SPECIFICATIONS

Model:	HDC-701A-BK, HDC-701A-BL
Dimension:	114x74x15 mm
Weight:	110gm
Fan Speed:	2800rpm+-10%
Air Flow:	22.3CFM
Voltage:	DC12V
Body Type:	3.5"
Noise Level:	<26 dBA

MODEL: HDC-701A-BK (BLACK)
HDC-701A-BL (BLUE)
