

With the advent and subsequent popularity of portable computers, power management of system components has become an important issue. The NexStar 3i Power Management Enclosure can reduce energy consumption and cooling costs, reduce noise, and prolong the life of hard drive. Less electricity consumption with three intelligent power management modes: Idle, Stand By, and Power Down. The NexStar 3i utilizes USB2.0, offering speed up to 480Mbps, and it is an ideal way to store and transfer large amounts of data in an enclosure that matches your style!

**BUILT-IN  
POWER  
MANAGEMENT**
