- Support Dual Power Voltage: 1.8V and 3.3V

• Introduction:

The Multi-size Dual mSATA to Two SATA III Port Converter Kit allows for flexible installation of two mSATA to Two SATA port anywhere. This device can be mounted in a Standard card slot, Drive bays or other custom mounting method available. This Dual mSATA offers two interfaces for connecting mSATA Solid State Memory for the fastest speed possible for your system. It could be used for super-fast booting and application loading or application that requires super-fast storage or even RAID using your system board RAID Chipset. This Converter offers the same 6Gb/s per port performance that you will expect from the mSATA using the pass thru function. Its unique design allows for different size two mSATA cards like 27mm and 50mm in length to be fitted into the system easily. This converter will give you the flexibility and performance that you need.

• Specifications:
